### Organisers

Piotr A. Kowalski, Systems Research Institute, Polish Academy of Sciences, Poland

[pakowal@ibspan.waw.pl](mailto:pakowal@ibspan.waw.pl)

Szymon Łukasik, Systems Research Institute, Polish Academy of Sciences, Poland

### Scope:

Intelligent Computing (IC) facilitates solving difficult problems found in various fields of science, and engineering through a use of nature-inspired computational methodologies. This area, as multidisciplinary and quickly-evolving one, is frequently explored by early-stage researchers, working on broad range of techniques. **International PhD Projects in Intelligent Computing** project is financed by the **European Regional Development Fund** under the **Operational Programme Innovative Economy** operated by **Foundation for Polish Science (FNP)**. The project, carried out by the consortium of 3 Polish and 16 research institutions from all around the world, provides PhD students with a unique opportunity to conduct research in the most innovative fields of science under the supervision of leading scientists.

MPD sponsored Track on Intelligent Computing will comprise a session devoted to presentation of the results obtained within the project but also invites the submission of papers on all aspects of IC including, but not limited, to:

- Intelligent Systems
- Natural Language Processing
- Data Mining and Data Analytics
- Evolutionary Computations
- Cloud Computing
- Fuzzy Statistics
- E-Business Processes Modelling
- Big Data
- Computing with Words
- Information and Data Processing
- Model Checking
- Cellular Automata
- Multi-Agent Systems
- Intelligent Decision Support

with both theory and practical applications being within its scope.

Papers should follow Intelligent System IS'14 guidelines and be submitted by **March 31, 2014** through e-mail directly to the organisers of the session ([is.ieee.track.chairs@gmail.com](mailto:is.ieee.track.chairs@gmail.com)).
